

## Sponsor Testimonial from an RBR Premium Member

RBR Premium Member Don Macrae sent us this, unsolicited, after reading a Product Review we did of our sponsor Sports Optical's Rx cycling glasses, and then deciding to take advantage of their discount offer based on the Review. (We are more than happy to review Sponsor product as part of the Sponsorship process.)

Don wrote:

"I wear specs all the time, progressive lenses, quite a strong prescription. This of course has meant the benefits of sports glasses has been denied me. Recently I got some bifocal contacts and a pair of Rudy Project Rydons. This solution worked, but the contacts were not quite good enough for reading, so I not only had to put them in before a ride, I had to take them out afterwards. Such hassle, I stopped doing it and went back to wearing my regular specs.

"Then I read John Marsh's [review of Sports Optical's lenses](#), which prompted me to email Sports Optical to ask if they could make progressive lenses for the Rudy Projects. No problem, they said, we've made lots. Anyhow, I ordered some, and received them earlier this week. They work! Sports Optical do a good job, plus they're a pleasure to deal with.

**"With a product like this, Sports Optical being in the U.S. and myself being in Australia, I would not have risked the transaction without a meaningful testimonial, and that was John's review.**

"So this is to thank you for that, and to give Sports Optical an elephant stamp."
